ASSIGNMENT I : Integrated Software Development Workshop 2020/2021

Objectives

This assignment evaluates a student ability in web platform development.

Specification

Setup LAMP or WAMP stack (MySql is optional). Create a web application to allow users to write and store notes. The web pages/forms should not be created using WYSIWYG text editor or from ready-made template. The notes will be stored in either text file or MySql.

Mark distribution:
Web server setup: 20%
GUI (HTML+CSS): 40%
Storage (HTML form post, save data): 20%
Retrieval: 20%

Due Date: 29 November 2020

Submission format

All codes (HTML, CSS, PHP, and scripts) + 3 mins (max) video recording of running the web application. Starting from the webserver, entering inputs and displaying the input.

Notes

This assignment is to be done by 1 or 2 students in a group. Any part of the program submitted by a student/group for the evaluation must not be shared with another student/group. Anyone caught copying or let his/her program to be copied will automatically get zero mark for the assignment. References taken from any sources must be quoted and declared. Codes copy from the Internet will not be given any marks.
